

The goal of the Board of Trustees for St. Maries Joint School District No. 41 is to provide a safe and healthy educational environment. In the event of air quality concerns, the building administrators will check the air quality levels before school and before lunch at the following website: <http://www.airnow.gov>

- If the particulate count is below 100 there will be no extra precautions taken.
- If the particulate count is between 101 and 150, alternative outside recess plans will be provided for those students with documented respiratory concerns, for example, asthma. Extra water breaks will be encouraged for other students.
- If the particulate count is 151 or above, there will be no outside recesses or athletic events until the particulate count falls below 151.
- St. Maries Middle School and St. Maries High School will follow the Idaho High School Activities Association (IHSAA) guidelines for all practices and events. Adherence to these guidelines will be monitored by the Athletic Directors for each school.
