

Policy Title: Special Education

Policy No: 602.04

St. Maries Joint School District No. 41 recognizes that some students have learning disabilities which cannot be dealt with in a normal classroom situation. Consequently, resource rooms have been developed and specially trained instructors employed for the specific purpose of serving the needs of students in grades pre-school (P) through twelve (12) who require help in overcoming a learning disability or who have needs which cannot be fulfilled in a traditional classroom.

Students who participate in these programs must be tested by a qualified school psychologist. Parent's permission for testing and placement in these programs must be obtained.
