

Policy Title: Budget as a Spending Plan

Policy No: 801.07

A Budget should do more than fulfill the legal aspects of fiscal responsibility. It should be prepared with the purpose of portraying the educational program with knowledge of what is needed to adequately fund the various curricular offerings and to maintain the learning environment. As the need to budget more funds in some areas of the program and to cut back in others becomes evident, appropriate adjustments must be made.

Enough thought and planning should be undertaken when preparing the Budget so that a reasonably accurate accounting of the total educational program will be conspicuous.
